EXPERIENCE

PXI Labs

Houston, TX

Head of Mobile UI Design

June 2026 - Present

- Designed camera interface UI prototypes in Figma focused on accessibility and usability
- Modified front-end pages using TSX and CSS to improve user experience and interface functionality
- Gathered and analyzed customer feedback to refine product design and improve accessibility for users

Sweat2Swim

Philadelphia, PA

Remote Shopify Ecommerce Intern

June 2026 - Present

- Optimized Shopify landing pages to improve customer engagement and site performance
- Created and integrated an email newsletter system to strengthen customer communication and retention
- Improved product presentation and ecommerce flow to enhance customer retention and user experience

San Diego State University - Digital Innovation Lab (DiLab)

San Diego, CA

Front End Developer

February 2026 - Present

- Utilized customer data and pain points to create a user interface that was accessible for clients with neurodiversity
- Used coding languages such as JSX and CSS to translate design from figma in visual studio code
- Used bun based development environments to test a live simulation in order to discover user experience pain points

FIT ME

San Diego, CA

Front End Developer/Co-Founder

August 2025 - Present

- Built and iterated working prototypes on Figma for app development
- Utilized customer data from surveys in order to increase customer retention by 20%
- Used coding languages such as CSS and HTML to translate design and wireframe to adjust to customer preferences

NEP2UNE Design Studio

San Diego, CA

Sole Proprietor/Creative Director

November 2021 - Present

- Established a clothing brand that has amassed over \$120,000 in sales and reached customers across 15 different countries.
- Created an optimized website for customer usage according to user statistics and tendencies and increased customer engagement by 200% on release days while managing inventory, purchasing, and business operations
- Used Adobe Creative Suite (Illustrator and Photoshop) to design mockups, technical packs and advertisements that amassed over 120,000 likes and 12,000 followers across all social media.

PROJECTS

Multistage Crypto Trading Pipeline

March 2026

- Built a multithreaded crypto trading pipeline in C++ to process staged transactions efficiently
- Implemented monitor-based thread synchronization to coordinate concurrent execution

CalPal - Coding Language for Fitness

May 2025

- Utilized TextX, EBNF, and Python in order to create syntax for a coding language that was created for calorie tracking
- Used python to develop an algorithm to calculate calories, BMI, and optimized calorie goals

ORGANIZATIONS

Alpha Kappa Psi

San Diego, CA

Active Member/Design Director

November 2024 – Present

- Designed merchandise using Adobe Creative Suite for the fraternity that fundraised over \$2,000 in sales
- Collaborated with a team of 5 members to launch a marketing campaign
